

Scotland's 10 Year Farmed Fish Health Framework

The Scottish Government committed within the 2017/18 Programme for Government to develop a strategic framework for farmed fish health in Scotland.

This document was produced by the Farmed Fish Health Working Group, co-chaired by Ben Hadfield, MD of Marine Harvest Scotland Ltd, and Professor Colin Moffat, Head of Science, Marine Scotland.

The framework identifies seven work streams; Information Flow and Transparency; Gill Health; Sea Lice; Cleaner fish; Production Cycle and on-Farm Management; Licensing Regime and Medicine Use; Climate Change and Ocean Acidification. The full report can be viewed [here](#).
